RELATED PROJECTS

Santra ERP

Develop Santra.id, an ERP designed to help backend for Various type of business. Our products consist of Accounting, Inventory, Farm, and HRIS

- Architected and shipped a schema-per-tenant multi-tenant platform serving real businesses in production, owning the full stack end to end
- Built an Indonesian payroll engine implementing statutory PPh 21 (monthly TER per PMK 168/2023 with December annual reconciliation), BPJS across all five programs, and THR, with date-effective tax rules that keep historical payslips immutable.
- Designed a double-entry accounting core with automatic journal generation, moving-average inventory costing, invoicing, and exportable financial reports.
- Hardened the platform against real security-audit findings, 3-tier role-based access control, maker-checker approval for sensitive write-offs, and UU PDP data-privacy compliance.
- Drove useability for business. Vector AI, Barcode Scanning, Easy to use ERP Modules, and Connectivity access using whatsapp to get all the data in one single message.
